

Vacuum System. Chemical

> **Designed to obtain vacuum pressure for a Chemical Industry reactor**

- It consist of:
- Booster
 - 1 Surface Condenser
 - 1 Silencer
 - 1 Vessel for condensate
 - 1 Vacuum Pump with plate heat exchanger for full recirculation

Suction:

- Flow: 14Kg/h (N₂ + Steam + Air)
- Pressure: 0.5 Torr abs

EQUIREPSA participa en Proyectos Químicos con empresas internacionales líderes en el sector.
